

ELVIS

Dear activ8-3D,

On behalf of Elvis Communications, I would like to offer my sincerest thanks for your input during our Peroni bar tour 2009 project.

activ8-3D were a pleasure to work with, both friendly and professional throughout our relationship. The hologram display system was a huge success, proving to be an eye catching centre piece to our events. As most people had never seen a hologram display like this before, it received a lot of attention and gave visitors a lasting impression of the Peroni brand message we were looking to communicate.

The 3D holographic content for the system was created to an impeccably high standard. Throughout the often evolving project, activ8-3D were professionally flexible and accommodating to the clients requirements.

Thank you for all your hard work, excellent project management and fantastic hologram display!
